

## Sid's Place - A Psychedelic Odyssey

1969, Tom Calder's van is involved in a car crash, it's loaded with kilos of marijuana. He runs from the law, he runs from a hit-man, joins a band, lives on a commune, learns Tai Chi, joins the underground railroad, trains in a Libya terrorist camp, bombs a police station...

Three years of turbulence described in detail by someone who lived amongst the fugitives, exiles, criminals, and Green Berets of the flower power years.

A rare inside look at the underground lifestyles of the Nixon and Reagan years.

No longer being pursued by the F.B.I.  
The Coyote lives a peaceful life
